

Dyeing

1	GBantmigrating AM	Padding auxiliary for continuous dyeing of piece goods composed of cotton, polyester, and polyester/cotton blends. It is used for increasing penetration and color yield & as leveling and dispersing for reactive printing & digital printing
2	GBcid FM	Buffer of organic acids for use in dyeing and printing, pH stability of buffer solution are comparable to Eulysin S buffer & stronger than acetic acid. And When GBcid FM is used to neutralize cotton or blends over flow rinsing of 10-15 min to reduce PH to around 8-9 then you add GBcid FM
3	GBcid AS	Buffer of organic acids for use in dyeing and printing.
4	GBalkaline buffer & leveler	Alkaline buffer for the alkaline dyeing of PES fibers in order to avoid oligomer deposits as well as reactive dyeing leveling & buffer (no need to add alkali for fixation) & Replacing soda ash
5	GBdispersing BL	All-purpose, liquid dye-dispersing agent. No change of shades ,no silicates.,& is very light Brown in color... .etc
6	GBdispersing WS	Light beige universal high quality anionic dispersing agent for dyes. No change of shades, no silicates.,& powder is very light beige in color... .etc
7	GBreduction clearing ECO	Liquid reducing agent for clearing dyeings on polyester, polyacrylonitrile, cellulose acetate and blends of these. For use in dye baths in the acidic range. reducing time, energy & water.
8	GBkol SN 2	Economical Dispersing agent, protective colloid and complexing agent for use in all stages of dyeing processes for cotton and blends of cotton and other fibers.

We formulate
German Basic Chemical Products

9	GBkol SN	Dispersing agent, protective colloid and complexing agent for use in all stages of dyeing processes for cotton and blends of cotton and other fibers.
10	GBkol SN 100	Highest concentrated Dispersing agent, protective colloid and complexing agent for use in all stages of dyeing processes for cotton and blends of cotton and other fibers (high concentrated).
11	GBkol Knit Leveler	High dispersing effect, Protective colloid & High sequestering power without Lubricant (100 % Paste), for aftertreatment reactive, direct dyeing (easily dissolved in water).
12	GBleveler WO/PA	Versatile dyeing auxiliary for WO/PA as a levelling agent and for improving the rub fastness of dyeings with 1 : 1 metal-complex, acid dyes on wool and of dyeings on half-wool & nylon.
13	GBleveler SFD	APEO-free levelling agent for dyeing polyester fibers under HT conditions, ensures uniform exhaustion of disperse dyes and promotes levelling-out in the HT phase and penetrating agent in printing e.g. flag printing (phthalate free).
14	GBleveler SFD New	APEO-free levelling agent for dyeing polyester fibers under HT conditions, ensures uniform exhaustion of disperse dyes and promotes levelling-out in the HT phase and penetrating agent in printing e.g. flag printing (phthalate free).
15	GBvat Leveler P Liquid	Leveling agent for vat dyes improves the levelness of exhaust dyeings with vat dyes on cellulosic fibers, generally without affecting the colour yield.
16	GBojet BDS	Very economical dispersing, sequestering and buffering versatile multi. purpose liquid auxiliary for use in polyester dyeing ... etc (one shot including non volatile Acid buffer).
17	GBojet PELS	APEO-free combined dispersing and levelling agent for dyeing PES fibres with disperse dyes under HT conditions & replacing carrier. greatly reduces deposition of PES oligomers on fibers and in dyeing machines (one shot product) (phthalate free)..

18	GB ojet PELS New	APEO-free combined dispersing and levelling agent for dyeing PES fibers with disperse dyes under HT conditions & replacing carrier. greatly reduces deposition of PES oligomers on fibers and in dyeing machines (one shot product) (phthalate free).
19	GB antishrink ASA	For restricting the permanent setting of wool during dyeing & as acid demineralization Dyeing wool at the boil leads to permanent setting of the fiber, and this has a detrimental effect on processing and product performance which is restricted by using it.
20	GB kol RSA	Universal after soaping agent for removing unfixed reactive dye from cellulosic materials.
